

26 Ethical Use of AI in the Workplace

1-day programme

AI is already shaping decisions in recruitment, performance management, and customer service. This programme helps organisations use it responsibly - with fairness, transparency, and human accountability at the centre.

What you'll learn

- The key ethical risks of AI in workplace decision-making
- How bias enters AI systems and what organisations can do about it
- Privacy, data protection, and employee rights in an AI-enabled workplace
- Building governance frameworks for responsible AI use

Who is it for

Leaders, HR professionals, compliance officers, and managers involved in implementing or overseeing AI tools in the workplace.

Duration

1-day programme

Outcomes

Participants leave with a practical framework for evaluating and governing AI use in their organisation, grounded in fairness, accountability, and transparency.
