

35 Integrity Audit - Focused

Bespoke engagement

Sometimes you need a clear signal before you commit to a full investigation. The Focused Integrity Audit is a structured, high-level scan designed to give boards and senior leaders an honest picture of where their organisation stands - quickly, discreetly, and without disruption.

What you'll learn

- Structured review of governance documents and publicly available information
- High-level assessment across six integrity dimensions: leadership conduct, speak-up culture, policy coherence, accountability structures, ethical climate, and compliance posture
- Identification of the two or three most significant risk signals requiring attention
- Benchmarking of your organisation's integrity posture against sector norms
- An independent, external perspective - free from internal politics or assumptions
- A concise written findings summary with a clear integrity signal (green / amber / red)
- A prioritised shortlist of recommended next steps, including whether a deeper audit is warranted
- A confidential senior debrief session to walk through findings and answer questions

Who is it for

Boards and senior leadership teams wanting a pulse check before a major decision, merger, or governance review.

Duration

Typically completed within 2-3 weeks. Includes a structured briefing, document review, and a senior debrief session.

Outcomes

A concise findings report with a clear integrity signal and prioritised recommendations for further action or deeper investigation.
